

Tell me about yourself

My name is Beesetti Saikumar . I was born and raised in Visakhapatnam since childhood. I was currently pursuing a **Bachelor of Commerce** from Andhra University located in Visakhapatnam. I have also enrolled for the **Data Science** course from **Edyoda** digital university and accomplished **Python certification** and looking forward to completing my data science certification.

During the course, I have done a **Food ordering app** and a **Game rental app** which works similarly and it is basically a python code. The agenda of the project is to have functionalities for login access to user and admin. The program contains CRUD(create,read,update,delete) operations which helps admin to add or remove the items in app.The user can order the items available in app by logging in. I am working on my other skills like DSA, SQL, and Machine Learning as well.

I am fresher and have no work experience in any company. My strength is that I can adapt quickly to any environment. My short-term goal is to get placed in a reputed organization, which will allow me to enhance my skills and Knowledge. *My long term goal would be to reach a higher position as a software developer. That's all about me. Thank you for giving me this opportunity.*
